

A screenshot of a Windows desktop environment. The desktop background is a scenic image of a lake and mountains. On the left side, there is a vertical taskbar with various application icons including Google Chrome, Firefox, and several folders. The main window is a web browser displaying the W3C CSS Validator website. The browser's address bar shows the URL 'jigsaw.w3.org/css-validator/validator'. The page content indicates that the document validates as 'CSS level 3 + SVG' with 'No Error Found'. Below this, there are instructions on how to display a validation icon on a web page, accompanied by two code snippets for HTML. The first snippet shows how to link to the validator and reference the 'valid CSS' image. The second snippet shows how to link to the validator and reference the 'valid CSS' image. The page also includes a 'W3C DEVELOPERS' section with a link to donate and a 'Warnings (1)' section listing a warning about style sheets not being checked in direct input and file upload modes. The Windows taskbar at the bottom shows the search bar, task view button, and several open applications, including the W3C CSS Validator browser window.
